

INSPIRING FUTURE OF COOLING

Airdesign™

HEATING | VENTILATION | AIRCONDITIONING

**WELCOME TO OUR
WORLD OF AIRDESIGN**

We provide complete solutions in the Heating Ventilation and Air conditioning systems extending its services to residential, commercial and industrial use. Airdesign develops amazingly sophisticated yet durable, cost effective and customized HVAC systems that provide optimum performance and capable of constant use under any climatic conditions across India. Each product is a masterpiece in its own, delivering years of, energy-efficient performance, quiet operation and minimum impact on the environment.

VISION

We strive to be premier in the HVAC segment, setting high standards for all service providers by providing quality, value, and client satisfaction.

MISSION

Deliver innovative HVAC solutions to our clientele, that stay cost effective, energy-efficient performance, quiet operation and minimum impact on the environment.

VALUES

WE!

aspire and pledge to be the best.
are respectful and kind.
have fun.
are professional in everything we do.
have integrity and we stick to our commitments.
listen to learn and communicate efficiently.
celebrate successes of one another.
take pride in workmanship.
take ownership and responsibility.
are innovators.
are Airdesign.

CORE STRENGTHS

Our core strength lies in developing and installing ready and custom-made requirements of HVAC solutions, based on drawing and design as shared to our core engineering team force.

Customized requirement and design is backed with documentation, for core designing confidentiality.

SAFETY COMMITMENT

- We are committed to provide safety at work place, and ensure our employees, engineers, clientele, tools, components, machines and anyone else who are associated by our operations are safe, that the products and services we deliver to our customers are safe, and to have a commitment to and record of protecting the natural environment.
- We assign dedicated safety officers from the start to completion of the project phase.
- We conduct safety trainings for our entire workforce on a regular basis.

QUALITY POLICY

We are committed to enhance satisfaction of our client associations and achieve sustainable business practices by way of:

- Supplying consistent quality products.
- Maintain delivery timelines.
- Continually enhance the effectiveness of the quality management system.
- Comply with applicable statutory and regulatory requirements.
- Provision of Third party quality surveyor (QA / QC Engineers).

IMRAN SIDDIQUE

Director

Imran holds over a decade of experience in the service industry. He co. founded Airdesign HVAC Pvt. Ltd. on Feb 2014, and was responsible for the profitable and sustainable operations of all HVAC services across PAN India. He looks at collaboration with customers for their unique needs, evolves to match the changing requirements of his customers, and innovates through value engineering. With time came his rewards. He was termed as the first dealer to get qualified for WCCD league in very first year of dealerships with Carrier Air conditioning refrigeration limited in the year 2015. He holds a certification of being a Post-Graduate in HVAC engineering from Suvidya Institute of Technology, Mumbai.

OUR TEAM

Dynamic service providers to an evolving HVAC world. Our tried and tested HVAC capabilities have been developed over the years with diversified projects delivered across India. A united pool of talented experts with core engineering skills in key HVAC industry segments, makes our product and service line a completely integrated service model. Expertise in complex projects, be it an on time, cost effective and environmentally-friendly solutions driven project delivery, quality systems and processes, our engineers, are the go-to consultants for integrated HVAC solutions from concept to commissioning. What sets us apart from everyone else is an extraordinary sense of urgency, an ability to hustle and a need to do what is never been done before. Our team understands the market demands and works to provide customized solutions adding value at all stages for our customers.

PROCESS FLOW

▶ **PROJECT STUDY**

- Complete site survey.
- Understanding user's requirements (URS.).
- Project deliverable, goals & benefits.
- Project quality standard and success metrics.
- Risks and issues associated with the project.
- Project budget, time and resource constraints.
- Customer communication / contact plan.

▶ **DESIGN ENGINEERING**

- Heatload estimation with HAP. software.
- Machine selection with respect to applications.
- Generation of design based report (DBR.).
- Schematic / general arrangement drawing.
- System proposal with multiple options.
- Technical and commercial evaluations.
- Electrical power consumption and ROI.
- Electrical and civil requirement sheet.

▶ **PROJECT EXECUTION**

- Detailed shop / construction drawings.
- Work schedule / bar chart of milestones (MSP).
- Internal & external kick-off meetings.
- Contractual documentation and communications.
- Achieving project objectives : task & team needs.
- Manpower planning - activity / productivity index.
- Safety management as per EH&S. policy.
- Regular quality & quantity analysis.

▶ **PROJECT HAND OVER**

- Testing & commissioning of project as per standards.
- Faster clearance of snag lists if any.
- Testing / reading with modern tools: Data logger, CFM. meter, DB. meter, energy meter for days as specified.
- Documentation and validation of projects (DQ., IQ., PQ., OQ.).
- Training of system operation to clients team / user.
- Internal hand over to service team and introduction to client.
- Handing over of project with service escalation matrix.

EMPOWERING YOU WITH THE POWER OF COOLING

From chillers to room air conditioners, all of our products fulfill the highest quality standards. Energy efficiency, easy handling and long lifecycles are among the essential features of our every single product. And open communication standards enhance compatibility and easily allow for seamless integration into building automation and control systems, this is how it empowers you to the power of cooling. We offer you all the products you need from just one source. You benefit from consistent installation processes for every single product. Plus, you'll receive support anywhere and anytime, with our tools and apps. designed to make your work as simple as possible. You can now focus on creating perfect places for your customers.

Wide range of Carrier and Toshiba air conditioning products

• Air-Cooled Chillers

Water-Cooled Chillers •

• Cassette Units

Advanced Technology Variable •
Refrigerant Flow (VRF.)

Ducted and Packaged Units •

Inverter & Fixed Speed •
Hi-Wall Split Units

Air distribution work

• Rectangular, Round and Oval GI. Ducting Work (SMACNA. Standard)

Linear and Curved Grill, Diffusers and Dampers (VCD.) • Jet Nozzles and Slot Diffusers

Sound Attenuators •

Chilled water low side projects

• Variable Frequency Drives

Variable Air Volume Control Dampers (VAV. Boxes) •

• Customized Air Handling Units Air purifier & De Humidifier

Ventilation projects

● Basement / Car Parking Lot Ventilation

Commercial Kitchen Ventilation ●

● Staircase and Lift Well Pressurization

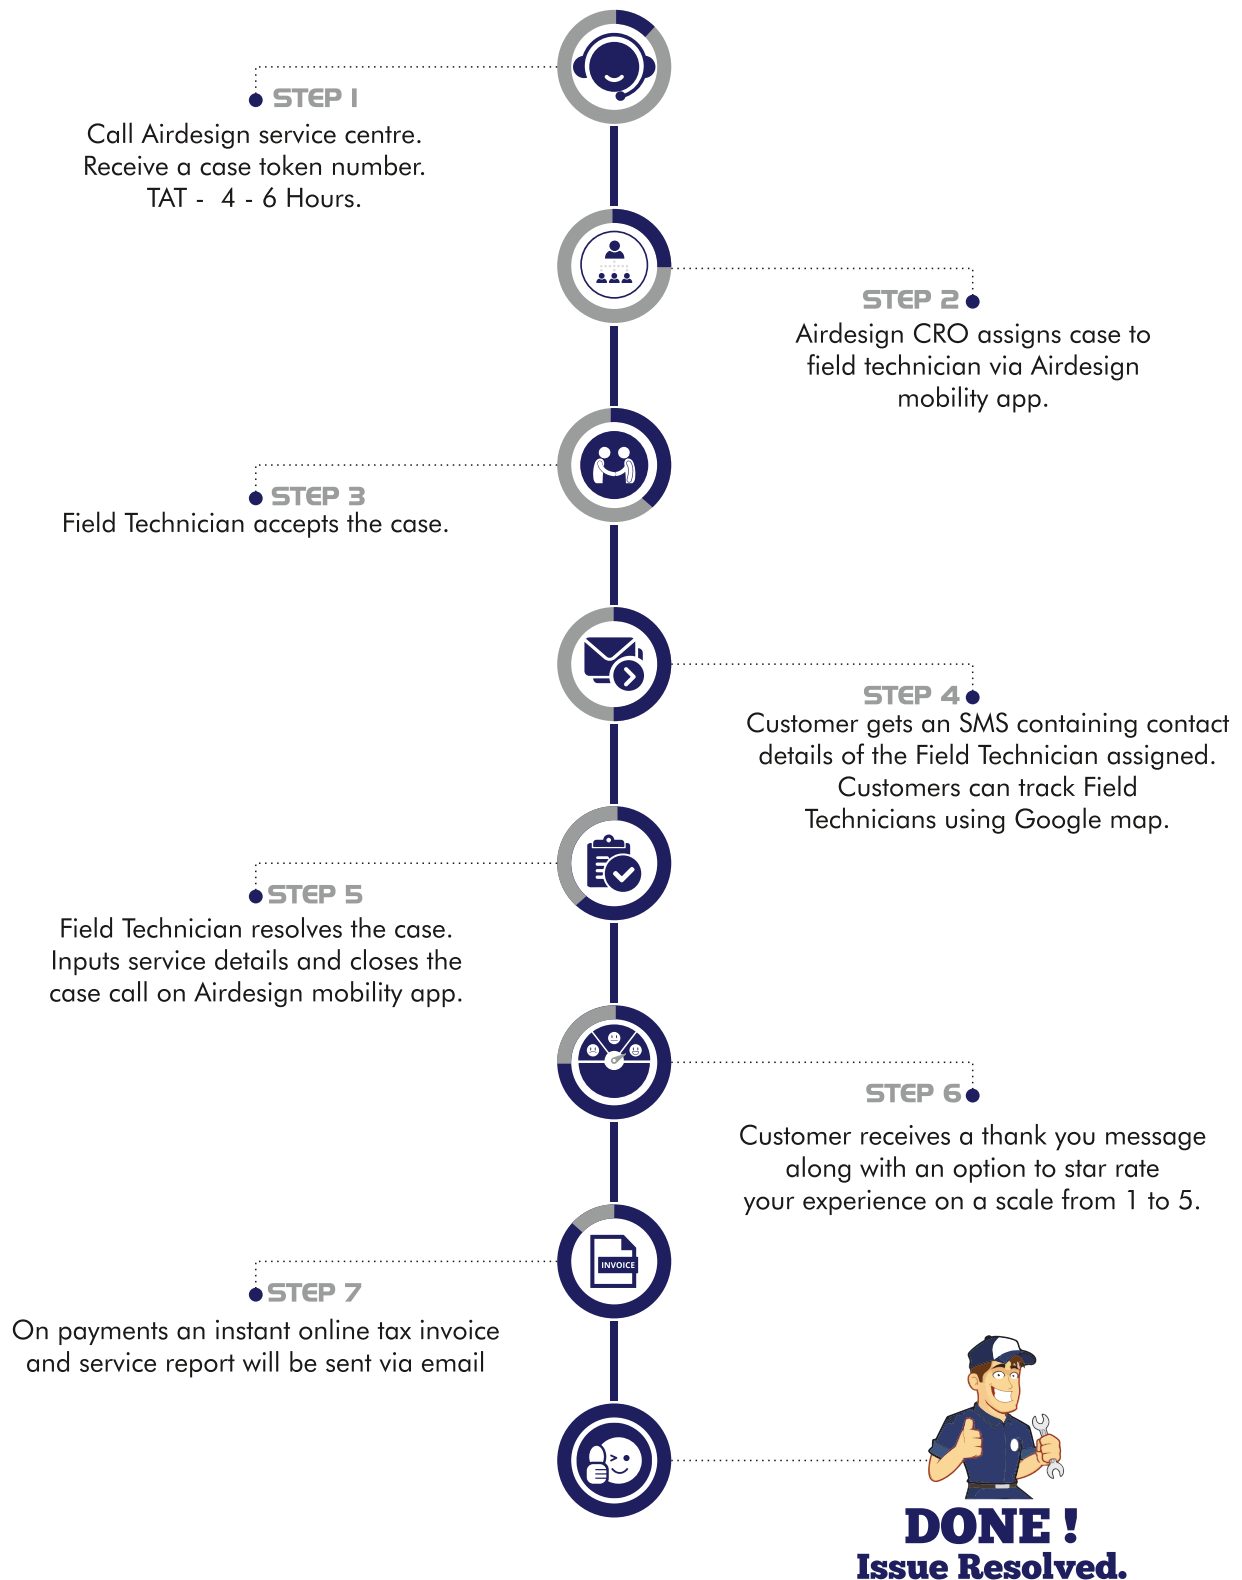

Air Washers and Humidification Systems ●

 **AirDesign**
Mobility Application

Empowering you with the cutting edge technology
that will transform the future of HVAC
after sales maintenance & services.
Power be with you.
Introducing AirDesign mobility Application

- Comprehensive maintenance contracts (CMC. all inclusive).
- Service maintenance contracts (only labor).
- Repaid and general maintenance.
- Energy audits.
